

ABSTRACT

Personal Voice Emergency Message Alarm Responder Watch, Unit/Multiplex Unit

This invention is a digital self contained, portable, non-portable personal alarm device used for recording and retrieving digital personalized recorded messages as well as keeping the time, date and month. Emergency or non-emergency information is recorded in a digital tape or tape-less watch/unit. Optional is its ability for it to have some to all of the listed features; a personal alarm, detector for; smoke, fire, or other environmental conditions, a homing device, and text messaging, medical information and personal siren. It is like having an awesome assistance with you all the time, simoutanously relaying vital life-saving information.
